DONNER LES VARIATIONS DE f (x):

$$f(x) = -x^5 - x^4 + x^3 + x^2$$

$$f'(x) = -5x^4 - 4x^3 + 3x^2 + 2x$$

x	-1	_	0.54	0		0.74
f'(x)		_	+		_	
variation de $f(x)$	$+\infty$		0	0.1		$-\infty$
